

Cooperation in Virtual Reality

MACQUARIE
University

Researchers:

Dr Nathan Caruana, Dr Patrick Nalepka,
Ms Friederike Charlotte Hechler, Ms Ann Perez, & Prof Emily Cross.

Participants:

Adults (right-handed and normal vision).

Project Description:

The study is looking at how people navigate their interactions with other people, and understand social information such as gestures and eye gaze.

Participants will complete some brief questionnaires. They will then play a virtual reality game with their partner. Participants will be seated at a table while wearing a VR headset and a small motion sensor on their finger. Sessions will take approximately 1.5-2 hours.

Location:

The study is being conducted at **Macquarie University** – 4 First Walk (level 8).

Benefits:

Participants will be reimbursed **3credits/hour** if they sign up **via SONA** or **\$20/hour** for their time.
This research will **improve our understanding of social interaction**.

**Sign up via
SONA!**
